

A SOMERSET SCHOOL

JEFFERSON COUNTY K-12, MONTICELLO, FL

1450
KIDS SERVED

Project Overview

It's not often a school requests a playground after the fact, but Jefferson County's Somerset School of Monticello, Florida enjoyed their experience so much that they ordered a second playground shortly after the completion of their first project.

This particular project totaled well over \$100K but was phased out into stages for affordability. This allowed for the children of Somerset School to skip the wait and play sooner while payment for the entire project was split according to each phase of the project.

The experience from sales consulting to design to final installation exceeded expectations. In just under 3 months, 2 playground structures along with integrated shade were created and installed, and a lasting relationship was made.

Time Frame: 3 Mons.

Completed project took just under 3 months from sale to installation.

Budget: \$150K

For two K-12 structures plus installation and shade, we were able to stay under budget by nearly \$10k.
